PROFILE

Software Engineer with nearly two years building production web applications — JavaScript/TypeScript front ends over .NET back-end services — plus independent full-stack projects in React. Experienced in identity/SSO integration, CRUD system design, and remediating security vulnerabilities in enterprise platforms.

EXPERIENCE

Invimatic Technologies Pvt. Ltd.

Dec. 2024 – Present

Software Engineer

Pune, Maharashtra

- Engineered a health-log upload feature for a **.NET Windows service**, fixing a timer race causing missed executions
- Resolved log filename collisions and decoupled **upload-frequency logic** that had been mistakenly tied to unrelated activity-log triggers
- Built a full **CRUD system** for Gateway Error Filters in **ASP.NET MVC**, with duplicate prevention and validation
- Identified and remediated an **XPath injection vulnerability** in a production web application
- Integrated identity providers (**OKTA, SAML, Nextworld**) with SSO/IdP issuer mapping for a mobile platform
- Contributed **WPF/MVVM** desktop and ASP.NET Web Forms/MVC features to a **multi-tenant enterprise platform**
- Collaborated with **QA and product teams** to reproduce, triage, and resolve defects across desktop and web modules
- Participated in **code reviews** and followed **Git**-based branching workflows to maintain code quality across the team
- Wrote and maintained **unit tests** and documentation for new features to support long-term maintainability

Tata Communications Transformation Services

Apr. 2022 – Jan. 2023

Operation & Maintenance Engineer

Mumbai, Maharashtra

- Installed, integrated, and upgraded **ECI MUX** (NPT 1010, 1020, 1022, BG-64) and **TEJAS MUX** equipment
- Configured **Cisco switches** and provisioned multiple **data-center** connectivity links in day-to-day network operations

PROJECTS

Job Portal — React, Bootstrap, Spring Boot, MySQL

[GitHub](#)

- Built an online platform streamlining **end-to-end hiring**: a central hub for recruiters, hiring managers, and job seekers that automates manual hiring tasks
- Designed **RESTful APIs** with Spring Boot to handle job postings, applications, and user authentication
- Implemented a responsive **React** front end with Bootstrap for a consistent experience across devices

Number Base Converter — HTML5, CSS, JavaScript

[Live Demo](#) | [GitHub](#)

- Built a two-way converter between **Decimal, Hexadecimal, Octal, and Binary** number systems
- Implemented input validation to handle invalid characters and edge cases for each number base

Online Exam Form Filling System — HTML5, CSS, React, MySQL

- Developed a web application for **electronic exam registration** with a guided candidate-details flow
- Used **MySQL** to persist candidate records and structured form data reliably across sessions
- Built form validation and step-by-step navigation to reduce user errors during registration

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC)

Mar. 2024 – Aug. 2024

Sunbeam Institute of Technology (C-DAC)

Pune, Maharashtra

Bachelor of Engineering in Computer Engineering

Nov. 2020

Mahatma Gandhi Mission's College of Engineering and Technology – University of Mumbai

SKILLS

Languages : JavaScript (ES6+), TypeScript, C#, SQL, HTML/CSS

Front-End : React.js, Redux, jQuery, Bootstrap, webpack, Babel

Back-End & Desktop : Node.js, Express.js, .NET Framework, ASP.NET MVC / Web API / Web Forms, WPF (MVVM)

Databases : MySQL, MongoDB, Redis

Security & Auth : SAML, OAuth 2.0, JWT, Azure AD, SSO

Tools : Git, Azure DevOps, npm/NuGet
